

Comments for pRH5´:
7907 nucleotides

2 µ origin: bases 534-1412 (complementary strand)
Ampicillin resistance gene: bases 1543-2395 (complementary strand)
pUC origin: bases 2548-3221
RPR1 promoter: bases 3658-4069
Transcription start site: base 3985
RNase P leader sequence: bases 3985-4069
pRH Forward priming site: bases 3941-3962
MS2 RNA: bases 4099-4170
Multiple cloning site: bases 4192-4222
pRH Reverse priming site: bases 4319-4341
RPR1 transcription termination region: bases 4251-4688
f1 origin: bases 6109-6564 (complementary strand)
URA3 gene: bases 6617-7717 (complementary strand)
